

## AGENDA

CLIMATE ALLIANCE DIGITAL DAYS

Climate Alliance

# Carbon pricing at the municipal level

Online, 9 October, 13:00 to 14:30

## OBJECTIVE

The main goal of this workshop is to start a municipal dialogue about the development of a realistic Carbon pricing model for European cities, possible to use for different municipalities and national contexts. The development of such a model should benefit from the already existing experience in the Netherlands where municipalities are already working with carbon pricing models, but discussed in a wider group of municipalities with different characteristics covering the EU geography. The Klimaatverbond and Climate Alliance organizers of this workshop are looking for municipalities interested in the topic, willing to be part of a future pilot group developing such a European Carbon Pricing Model for Municipalities.

## STRUCTURE

**15:00 – 15:05 WELCOME**

**13:05 – 13:20 CARBON PRICING, AN EFFECTIVE TOOL FOR CLIMATE POLICY, CIRCULAR ECONOMY AND GREEN PROCUREMENT. PRACTICAL EXPERIENCE FROM THE NETHERLANDS.**

*Thijs de la Court, Klimaatverbond*

Explanation of the concept and the different elements of carbon pricing

**13:20 – 13:35 THE EXPERIENCE OF THE CITY OF AMSTERDAN WITH CARBON PRICING**

*City of Amsterdam*

**13:50 – 14:25 DISCUSSION WITH THE PARTICIPANTS AND DECISSON ABOUT FURTHER STEPS**

**14:25 – 14:30 CLOSING REMARKS**

## BACKGROUND

Putting a price on carbon emissions could be called the holy grail of climate politics. Calculating in the social and environmental costs of the energy and products we use so as to include these costs in municipal planning, cost-benefit analyses and procurement would dramatically change our world.

## THE CLIMATE ALLIANCE

For 30 years, Climate Alliance member municipalities have been acting in partnership with indigenous rainforest peoples for the benefit of the global climate. With over 1,800 members spread across 27 European countries, Climate Alliance is the world's largest city network dedicated to climate action and the only one to set tangible targets: each member city, town and district has committed itself to reducing greenhouse gas emissions by 10 percent every 5 years. Recognising the impact our lifestyles can have on the world's most vulnerable people and places, Climate Alliance pairs local action with global responsibility.
